

AROSO AdBlue®

AdBlue is a diesel exhaust fluid used in vehicles with Selective Catalytic Reduction (SCR) technology to reduce harmful gases being released into the atmosphere. AdBlue is a 32,5 % solution of high-purity, synthetically manufactured urea in de-mineralized water. It is a safe-to-use fluid. The use of AdBlue® is governed by the EURO V and EURO VI emission standards.

Instruction for use

Intended for use in diesel engine vehicles equipped with an SCR catalytic converter. Follow the vehicle manufacturer's instructions!

Properties

	UNIT	CHARACTERISTIC VALUES
Appearance	-	clear liquid
Colour	-	colourless
Relative density (20°C)	kg/m ³	1087 -1093
pH value	-	8 – 10
Odour	-	Ammonia

Notice: Values of physical-chemical parameters stated above are typical values.

Storage

Store in tightly closed containers in cold, at temperatures between- 11 and +30 °C, dry and well ventilated areas designated for this purpose. The shelf life is at least 3 years from the date of manufacture on the packaging.

Health, safety and the environment

Not a dangerous substance.
